	11/3	11/5	11/10	11/12	11/13	11/17	11/19	11/24	12/3	12/4	12/8	12/10	12/15	12/17	12/18
Starter phases	Break into classes and create			Logan: Mainscreen and main logic tab				Xavier: Background and time of day							
	foundation of game			Max: Creates Brawler Bird and incoorparates gravity				Randy: Obstacles and coins; two different classes							
Basic game and			Mostly functional game with a few mechanics still developing				Randy: Should be finishing up obstacles and coins and have them connected to main logic								
obstacles							Logan: Main Screen should be done and progressing through making level logic								
							Xavier: Continues to work on time and the screen following the brawler bird								
							Max: Basic Brawler Bird mechanics finished and working on a input for different birds and settings								
Increased design							Wraps up simple game and works			Randy: Makes different levels and incoorparates with the different obstacles					
							out multiplayer modes with level			Logan: Writes a script for changing levels at flag and works with Randy					
							development in beggining phases			Xavier: Adds different backgrounds for each level at corrects speed					
										Max: Works on different brawler bird mechanics					
New Levels									Continue to work on and finish levels and hopefully game				All: Create any missing components		
Bug testing													Play test and work out bugs		All: Final testing
Overall finish															Finished design
